

OPERATOR-TECHNOLOGIST FOR AI-ENABLED DELIVERY AND OPERATING TRANSFORMATION

Builds mechanisms that connect emerging technology to real work, human judgment, operating ownership and measurable outcomes. Experience spans AI-first operations, 24/7 customer-backward execution, high-reliability engineering, distributed commercial operations, governance, telemetry and cross-functional change.

Operating transformation

Human authority

Practice design

Adoption mechanisms

Quality and risk

Business-case framing

PROFESSIONAL EXPERIENCE

Vape-Jet

Director of Operations

2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
- Connects factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth

Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.

Cardinal Building Products

Regional Director

2021-2023

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu

Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders and governed execution.

Amazon

Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience and team engagement.

PROFESSIONAL EXPERIENCE - CONTINUED

Enviro Social Capital Chairman of the Board

2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE CMPT and EDS Pittsburgh Chapter Chair

2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing and emerging technology.
- Organized conferences, seminars, business tours and technical programming.

Compunetics Director of Operations and Engineering Management

2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel and AMD.
- Published industry articles, delivered technical talks and participated in the HyperTransport Consortium.

LEADERSHIP THROUGH-LINE

Creates operating visibility, decision cadence, human-authority boundaries, standard work, learning loops and cross-functional accountability. Comfortable moving between executive intent, technical detail and frontline execution.

EDUCATION

University of Pittsburgh

Bachelor of Science. Academic grounding includes materials science, physical chemistry and biology-related studies.

CREDENTIALS

- Google AI Essentials
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

TECHNICAL TOOLKIT

Agentic AI, LLM workflows, RAG patterns, human-in-the-loop design, Python, SQL, JavaScript, TensorFlow, Tableau, ERP/Odoo workflows, Jira, Confluence, HubSpot, Slack, GIS and mapping workflows.

ROLE-SPECIFIC TRANSFER THESIS

I do not claim Partner-level tenure in a CX consultancy or direct ownership of a global contact-center AI P&L. I bring adjacent operating evidence: AI-enabled workflow design, scaled 24/7 service execution, high-reliability technical delivery, governed automation, adoption mechanisms and the ability to turn complex work into accountable operating systems.

COMMERCIAL JUDGMENT

Frames AI opportunities around value, feasibility, adoption burden, reuse and time-to-value; built a remote regional operation and helped evaluate a \$200 million public-private feasibility concept.

DELIVERY DISCIPLINE

Built operating cadence, standard work, escalation and throughput visibility in 24/7 service operations; led technical delivery and quality systems in high-reliability environments.

GOVERNED ADOPTION

Designs human judgment, escalation, evaluation and governance into agentic workflows; connects telemetry, training, accountability and frontline feedback to operational change.
